## Summary

As a dedicated Laravel Developer, I hold a Bachelor's in Computer Science and boast 2 years at Egor Technologies. I am fervently committed to driving technological innovation. My expertise extends across programming, object-oriented design, and data structures, forming a sturdy foundation. Multitasking is a strong suit, and I've navigated diverse domains, including e-commerce, admin panels, and API integration. Proficient in crafting elegant, efficient code, I excel at tackling complex challenges and creating fully responsive, dynamic websites.

I'm committed to staying at the forefront of technology, constantly seeking new challenges to fuel my passion for growth and innovation.

## Experience

May 2022 - Present

### Laravel Developer

Egor Technologies, Lahore, Pakistan

I am a Laravel Developer at Egor Technologies, specializing in PHP Laravel. My expertise lies in backend development, where I handle complex backend tasks, implement various functionalities in web applications, and work closely with my team on project modules. I am skilled in both collaborative team environments and independent work. Additionally, I excel in creating APIs for web applications to enhance their functionality and user experience.

Feb 2022 - May 2022

### Web Developer

Mountainise, Lahore, Pakistan

During my time at Mountainise as a web developer, I've passionately taken on multitasking responsibilities, specializing in crafting responsive websites using HTML, CSS, and JavaScript. My dedication is evident in my work on dynamic JavaScript functionalities, enhancing the user experience. I've thrived on the challenges, gained hands-on experience, and eagerly contributed to diverse web projects, fueling my passion for web development.

## Education

## Projects

### Sketch 360

Crafted 'Sketch 360' with PHP Laravel, HTML, CSS, JavaScript, Ajax, and jQuery, empowering users to book hotels effortlessly. Robust validation and verification processes ensure data integrity and security. Admins manage hotel listings seamlessly, enhancing the user-admin interaction.

### Vendeee

My PHP Laravel project, 'Vendeee,' deepened my expertise with user, super admin, admin, driver, and operator panels. It's a comprehensive system featuring real-time chat, third-party API integration, and robust APIs for app development. I upheld rigorous validation and verification standards. This experience honed my skills in dynamic CRUD operations and managing large-scale projects.

### US Mobiles

"US Mobiles" is an e-commerce site built with PHP Laravel, featuring User and Admin Panels. Users can filter and order mobile devices, while admins manage listings and interactions. The project uses HTML, CSS, JavaScript, Bootstrap, Ajax, and jQuery for seamless navigation and dynamic functionality. My strict validation and verification contribute to a user-centric e-commerce solution.

### Real Estate Admin Panel

I've developed a Real Estate Admin Panel using Core PHP, Bootstrap, HTML, JavaScript, and Ajax. It simplifies property management for real estate professionals, enabling property registration, financial oversight, and collaboration. This project highlights my expertise in creating user-friendly solutions for the industry.

### University LMS

The University LMS Project showcases my expertise, utilizing HTML, CSS, JavaScript, PHP Laravel, Ajax, and jQuery. I've driven crucial components like student enrollment, fee processing, semester management, course assignments, and more, reaffirming my dedication to elevating education through an efficient Learning Management System.

### Ethereum Exchange

I developed a robust Ethereum Exchange project utilizing React JS, Web3 JS, HTML5, CSS3, and PHP Laravel for specific functionalities. Users can effortlessly connect their MetaMask wallet, manage transactions, and seamlessly convert ERC-20 tokens. This project significantly advanced my skills in React JS, encompassing components, state management, and props.

### Arain Bricks Company

Arain Bricks Corporation demonstrates my dedication to innovative web solutions, combining HTML, CSS, JavaScript, and PHP Laravel to efficiently showcase products and services. This seamless blend of technology and e-commerce enhances the client's online presence, akin to an eCommerce platform.

### Doctors Appointment Scheduler

Healthcare Enhancement Project: Developed a PHP Laravel-based website catering to both doctors and patients. Utilized HTML5, CSS3, JavaScript, and jQuery to optimize appointment scheduling and interactive communication. The project includes a dedicated admin panel for efficient appointment management and patient information.

### Installment Management

Presenting a robust installment management system designed for businesses. With a user-friendly interface, administrators

can seamlessly manage customer installments, sales, and product records, all stored securely in a database. The system offers detailed insights into customer information, installment records, and features an elegant dashboard. This project reflects my Laravel proficiency and is tailored to meet the specific needs of businesses.

**Second Hand Hounds**

I was fortunate to support the "Second Hand Hounds" project, serving as a dedicated web developer. This Wix-based project was tailored with HTML, CSS, and JavaScript. My role encompassed backend development, extensively utilizing JavaScript. "Second Hand Hounds" is more than a dog e-commerce site; it's a noble cause.

**Ailaaj Business**

I've been a key part of Ailaaj Business, Pakistan's cutting-edge digital healthcare firm. My role as a Front-End Web Developer focuses on creating a visually appealing and responsive web design using HTML and CSS. Ailaaj's mission is to revolutionize healthcare, and I'm dedicated to realizing this vision through our website's design and functionality.
